CS5030 - Software Engineering Principles

Assignment 1 - Feedback

Matriculation number: 210016568

Please see class-wide feedback as well.

Content

Importance of software to society	Good introduction. Some good points, supported by relevant stats. The latter part of this section has already moved towards the topic of the next section.
Challenges of modern software development	Some good points. Can consider more challenges in the general context in addition to those related to the pandemic.
Role of ethics in SE	Some good points here. 'whites' might be considered an impolite term.

Report

Identification	You should include your matriculation number (but not name or user name) in the report.
Structure	Good. You can include a brief summary or conclusions at the end too.
Length	You should include a word count in the report. This was required.
Formatting	Fine. Remember to use a capital letter to start headings.
Writing style	Good in general
References	Good set of references

Overall

Overall, this is a good effort at the assignment demonstrating understanding of software engineering issues but with some room for improvement as described above.
